I spoke with Mark Sommer, USFS Monticello 587-2041 today regarding the status of the DeVar Shumway Plan Of Operations for the Brown Claims. The site is located in the NW 1/4 sec. 15 T36S, R20E. Mr. Shumway wants to go in and remove some stone from the site using the access roads (which were existing when he acquired the claims). The USFS wants him to post a bond for road & site reclamation prior to any stone removal, but would allow him to do some road reclamation which may satisfy the claim maintenance he wants to do. This proposal should go out from the USFS sometime soon. Current disturbance is less than 2 acres and proposed disturbance is not likely to exceed 5 acres. Mark Sommer is replacing Jim Egnew and is currently doing work for Monticello & Moab districts.

DOGM will need to change the file number for this Plan Of Operations from a large mine designation (M) to a small mine designation (S/037/089) and remove this from the LMO review list.

A COPY OF THIS HAS BEEN SENT TO THE FILE.
